

FAQ - Computing Infrastructures

- ***Hi professor, there will be midterms?***
 - No, this course does not have midterm examination.
- **Could you please explain on how the groups division will work in this distance modality?**
 - The division of the two classes is directly managed by the School and depends on your surname and your Programme.
- **will the exam change with respect to the previous years?**
 - The technical content of the course slightly changed w.r.t. the last year while the examination modalities remain the same.
- **Are the lessons and slides enough to correctly succeed in the exam or you suggest also a book?**
 - All the technical contents of the course are described in the slides of the course. We strongly recommend to attend (virtual and physical) lectures to understand and deepen all the relevant points of the course. For some specific topics we will suggest books or technical papers. These suggestions are not mandatory for the course.
- **Will there be any additional info for the Geo Informatics students..?**
 - The course and the examinations will be the same for all the students of all the programmes.
- **will the exam will be Multiple choice or written examination...?**
 - The examination is written and with multiple-choice questions. Questions will address both exercises and theoretical questions.
- **Will there be extra projects? If so, will they be evaluated?**
 - There are not projects in the course
- **will this way providing lessons remain as it is for as long as we cannot physically come back to the university?**
 - This approach (recorded lessons and Q&A section) is used for the theoretical lectures. Exercise lecture provided by Prof. Palermo will be delivered live.
